# Inhalts-Verzeichnis

der

Deutschen Entomologischen Zeitschrift

Jahrgang 1893—1899.

Zusammengestellt

von

Reinhard Lohde.

### Inhalts-Verzeichnis.

Der Inhalt der 7 Bände 1893-1899 der Deutschen Entomologischen Zeitschrift ist in dem vorliegenden Verzeichnifs, dem siebenten in seiner Reihe, nach folgenden Gesichtspunkten angeordnet:

General-Uebersicht der	Ja	hrg	äng	ge					$S_{i}$	3
Gegenstände von allgem	eine	ren	ı	nte	res	se			4	3
Allgemeine Entomologie									-	4
Specielle Entomologie:										
Coleoptera						4				4
Diptera									-	31
Hymenoptera				:					1	32
Lepidoptera									-	32
Orthoptera									-	<b>32</b>
Rhynchota									-	<b>32</b>
Verzeichnis der Abbilde	unge	n:								
A. Tafeln									_	32
B. Textfiguren									-	34
Uebersicht der Anzeigen	und	Re	efer	ate	ve	n	ente	0-		
mologischen Publication									_	34
Necrologe und Todesanz	zeige	en							_	36

Zur Abkürzung ist bei den Jahreszahlen die 18 stets weg gelassen worden. Um dann eine leichte Unterscheidung von den Seitenzahlen zu ermöglichen, sind die Jahreszahlen fett gedruckt. Fehlt bei einem Namen etc. die Angabe des Jahrganges, so gilt die letzte vorhergehende fett gedruckte Zahl. T. bedeutet Tabelle.

Berlin, im April 1900.

Reinhard Lohde.

# General-Uebersicht der Jahrgänge.

- Jahrgang 1893. 368 S., davon S. 3 u. 4 Inhalt, S. 5 u. 6, 9-11 Allgemeine Angelegenheiten. VII Tafeln.
- Jahrgang 1894. 336 S. Inhalt S. 3-6, Allgem. Angelegenheiten S. 7-10. III Tafeln: Bildnis Westwood's.
- Jahrgang 1895. 448 S. Inhalt S. 3—6, Allgem. Angelegenheiten S. 7 u. 8, 278—80. Mitglieder-Verz. S. 9—18. I Tafel.
- Jahrgang 1896. 384 S. Inhalt S. 3-6, Allgem. Angelegenheiten S. 7 u. 8, 191 u. 192. I Tafel.
- Jahrgang 1897. 416 S. Inhalt S. 3-6, Allgem. Angelegenheiten S. 7. u. 8, 208. II Tafeln.
- Jahrgang 1898. 416 S. Inhalt S. 3-6, Allgem. Angelegenheiten S. 7-10. II Tafeln.
  - Beihefte: I. W. Horn: Revision der Cicindeliden mit besonderer Berücksichtigung der Variationsfähigkeit u. geograph. Verbreitung. (2 Bogen).
    II. L. v. Heyden: Catalog der Coleopteren von Sibirien etc. Nachtr. II u. III. 84+24 S.
- Jahrgang 1899. 416 S. Inhalt S. 3-6, Allgem. Angelegenheiten S. 7 u. 8, 221-24. Mitglieder-Verz. S. 9-18. II Tafeln.

### Gegenstände von allgemeinerem Interesse.

Bestand der v. Heyden'schen Sammlung 94. 271.

Einladung zur 66. Naturforscher-Versammlung [Wien] 94. 327. Einladung zur General-Versammlung

99. 8.
Erklärung des Vereinsvorstandes

Erklärung des Vereinsvorstandes 97. 8.

Mitglieder-Verzeichnisse 95. 9, 99. 9. Motto der Berl. ent. Zeitschr. 1893 94. 322.

Photographieen von Entomologen 93. 368, 94. 150, 95. 211, 369. Reisebriefe [Ceylon] von Dr. Horn I. 99. 129, II. 225, 111. 385.

## Allgemeine Entomologie.

Abdominalsegmente u. Copul.-Organe d. männl. Coleopt., Vergleichende Unters. üb. 93. 113, 94. 153.

Abdominalsegmente u. Legeapparate d. weibl. Col., Vergl. Unters. üb. 93. 209; Vergl. Morpholog. 94. 117. Copulationsapparat männl. Col. 95. 65, 19, 27.

Ductus ejacul. von Coccinelliden 96. 368.

Faunen: Afghanistan 94. 81; S.W.-Baical-Gebiet: Staphyliniden 93. 17; Deutschland: Beitrag VIII **93.** 353, IX **94.** 329, X **95.** 217, XI **97.** 197; Deutsch-Oesterreich: Agrilus 97. 193; Europa und Umgeb.: 98. 337; Issyk-kul: Chrysomelidae 94.97; Java: Cicindelidae 97. 49; Kamerun: Curculionidae 98. 17;

Mexico: Cicindelidae 97. 165; Nord-Africa: Dytiscidae, Hydrophilidae 94. 176; Oran: Myrmekophilen 95. 45; deutsch Ost-Africa: Curculionidae 96. 113; Ostindien: Staphylinidae 95.385; Rheinland: Myrmecophilen 94. 273; Russland: Col. 96. 33, 99. 193; Schlesien: Col. 93. 361, 94. 333, **95**. 436, **96**. 179, **97**. 204, **98**. 334, 99, 217; Sinaï: Col. 99, 240; Süd-Sumatra (Tebing-Tinggi): Lucanidae, Melolonthidae, Rutelidae, Cetonini, Buprestidae, Cerambycidae 94. 193; Tatra: Col. 94. 241; Transcaspien, Turkestan: Col. 94. 17; Vorder-Indien: Cicindeliden 94. 169; W .-Africa: Staphylinidae 95. 113.

Räumliche Verbreitung der Arten, Einige Worte üb. 96. 157.

# Specielle Entomologie. Coleoptera.

Ablapsis 93. 312, 316. Acalyptus caucasicus 99. 281. Acanthocnemus Kraatzi 96. 361. Acanthogethes Schilskyi 96. 312. Acanthotrachelus griseus 97. 383; Sharpi 383. Acanthovalgus 95. 444; Marquardi 444. Acarabus 97. 29. Acienemis praeambulus 98. 313. Aclees africanus 95. 231; fatuus 232. Aclypea seriatorugosa 97. 211. Acmaeodera ancilla 96 87; consobrina 83; fascipennis 82; repercussa 83; subscalaris 97. 214. Acrostiba borealis 93. 19. Acrotona curtipennis 96. 325. Acupalpus ruficeps 94. 35. Adalia bifasciata 98. 115; effusa, gabunensis, inclusa 115; Revelieri 97. 205; rufescens 98. 115; sexareata 97. 298.

Ganglbaueri 94. 145; Adelocera Kraatzi **93**. 192, **94**. 145. Adordanea T. **97**. 229. Adoretus guttulatus 99. 109. Adorhabdotus 96. 133; delta 98. 21. Adrastus T. 96. 157; circassicus, limbatus, lacertosus 158; porrectifrons 157. Aeolus Hauseri 96. 35. Aethina pilosella 95. 150. Agabus clypealis 99. 217; mela-

narius 94. 332; Spichali 99. 196. Agelia analis 96. 84. Agestrata de Haanii 97.410; lata 410. Agnaptoria 93. 312, 315; rubripes,

Seidlitzi 315. Agonischius dolosus, mutabilis 98.153. Agriotes Sikorae 96. 96.

Agrypnus crassiventris 99. 75; semistriatus 74.

Alaobia Heydeni 99. 218; obtusidens 95, 119.

Alaus T. 98. 413; angustus 99. 77; elegantulus 98. 414; gibberosus 412; intermedius 414, 415; Kolbei 99. 73; propinquus 98. 412, 414, 416; truncatipennis 416.

Alcides acutus **98.** 310; aschanticus **95.** 236; Conradti 236; discrepans **98.** 309; mellitus 308; otiosus **99.** 24; parcus **95.** 235; subfasciatus 236; vafellus **98.** 308.

Alesia connexa 98. 117; kwaiensis 97. 299; Oberthüri 95. 325; usambarica 97. 299.

Aleuonota exigua 93. 24; punctipennis 23.

Alianta bigranosa 95. 118.

Allorhagium inquisitor 98. 357. Allotopus 94. 162; Rosenbergi 162.

Alophus inopinus 94. 61.

Alosimus 96 195; Abeillei 215; araxis 225; armeniacus 216; brevicornis 280; castaneus 226; chalybaeus 224; cirtanus 217; collaris 232; decolor 227; elegantulus 222; gracilis 213; longicollis 213; luctuosus 234; luteus 228; maculicollis 231; marginicollis 218; pallidicollis 229; sulcicollis 230; syriacus 219; viridissimus 221.

Alphitophagus 4-pustulatus 93. 355. Amalus alpinus 97. 187; Ganglbaueri 188.

Amaurodes anchoralis **96**. 350; Passerinii 349, **97**. 252; tibialis **96**. 349. Amauronia T. **94**. 233.

Amorbaius cavicollis **95**. 250; infestus **98**. 77.

Amorphoidea pilosa 98. 302.

Amphimallus pilicollis 94. 80. Anaglymma 95. 266; congonis 262. Anaspis arctica 94. 332; Baudii 331; Costae 95. 218; Kiesenwetteri 97. 199; latipalpis 95. 217; nigripes 94. 331; Skalitzkyi 95. 218.

Anatona alboguttata 98. 223; atrocoerulea 97. 402; ferruginipennis 98. 223; flavoguttata 222; pilicollis 223; pygidialis 223.

Anchastus Championi 98.117; Weisei 190.

Ancyrophorus curtipennis 93. 65.

Anemia T. 94. 49; asperula 50; Chobauti 98. 349; fissidens 348; Hauseri 94. 50. Anisodera barbicornis **97.** 119; fraterna 118; rusticana 119. Anisomerus **97.** 12.

Anisoplia Koenigi 95. 309; Weberi 98. 342.

Anochilia apicalis 98. 403; bimaculata 94. 152; bipunctata 319; diluta 98. 403; dilutipennis 94. 319; flavipennis 98. 401; nigra 402; nigriceps 94. 319; picipes 95. 221; plagipennis 98. 403; rufipedis 94. 319; rufipes 98. 401; rufoplagiata 403; sellata 404; signata 94. 319; suturalis 98. 403.

Anomala basalis 97. 333; circumcincta 96. 34; nigrovirens 94. 46.

Anomalipus T. 97. 40; acutangulus 38; asidioides 40; carinatus 37, coriaceus 34, costatus 38, damaricus 37, elephas 33, hybridus 35, Kolbei 36, mastodon 34, ovalipennis 33, Savii 40, seriatus 35, thoracicus 39, variabilis 35.

Anomoederus interstitialis **96**. 135. Anopleta virilis **93**. 35.

Anoplischiopsis divisus 98. 141.

Antennaria 93. 330.

Anthonomus ornatus 93. 356.

Anthracophora borneensis **98**. 406, ceylonensis **95**. 110, crucifera 111, rusticola **98**. 406, siamensis **94**. 216, sinensis **98**. 406.

Antolethrus Hauseri 94. 44, silus 43. Aphanobius melanurus 96. 102.

Aphelochroa fulva 99. 86.

Aphilenia Hauseri 94.71; parvula 71. Aphodius costulatus 96. 33; Deubeli 97. 76; filitarsis 98. 341; humeridens 341; lividibasis 342.

Aphthona testaceicornis 94. 152. Aphthonesthis 95. 329; concinna 330.

Aphyocnemus 98. 50.

Apion alternans 99. 340; arborator 339; atricolor 97. 82, 85; circumscriptum 81, 82; constrictum 82, 84; credulum 98. 287; fabrile 99. 339; grus 98. 288; indolens 287; majorinum 290; mimosae 97. 82, 84; morosum 98. 290; nigerrimum 94. 65; nigrum 98. 335; obscurum 335, 99. 219; segne 95. 232; semotum 98. 291; tanganum 97. 81, 83; tonsile 98. 289; Weisei 99. 341.

Apoderiger 97. 263; cervinus 264. Apoderus bistriolatus 98. 296; Conradti 24; flavotorosus, picinus, seclusus 296; semipallens 25; vitreus 26.

Apogonia gigantea 94. 204; Kolbei 99. 141.

Apotomopterus 94. 137; eccoptopterus 138.

Aprostoma planifrons 95. 156.

Apteroessa 93. 328.

Araeorrhinus Fausti 98. 374.

Arammichus Eugeni 96. 41; latinasus 98. 354; ruminalis 94. 53; subconstrictus 96. 40.

Argopistes 95. 335; bistripunctatus 337; brunneus, 6-guttatus 336.

Argoptochus Strobli 99. 278.

Argopus guttatus, Haroldi 95. 332. Argyrophegges 95. 441; Kolbei 442, **96**. 359.

Armidia nigroterminata 98. 346. Arrhaphipterus Schellkownikoffi 94.

Arthrodeis T. 94. 47; antennatus, Hauseri 48.

Articeropsis 93. 111; Sikorae 112, 97. 264.

Asbecesta abdominalis 95. 186; biplagiata, cyanipennis 185; fulvicornis 187; fulviventris 346; ruficollis 347; rugosa 186; variabilis 346.

Asemus Andrewesi 97, 350; cephalotes 351; innocuus 350; madagascariensis 388; montanus 99.19; propinguus 97. 350; subvittatus

Aspidimerus 4-guttatus 99. 384.

Aspidiphorus 99. 384; 4-guttatus 95. 326.

Aspidomorpha 96. 16; amplissima 16; angolensis 18; apicalis 19; argillacea 18; bimaculata 17; bioculata 21; calligera 97. 104; chlorina 96. 22; chlorotica, celebensis 16; dorsata 97. 103; elevata 103; fenestrata 96. 21; frenata, indistincta, innocua, miliaris 16; nigricornis 18; nigromaculata 19; pilifera, producta 17; sellata 21; spectabilis 16; St. crucis 97. 102; sternalis 96. 20; striata 23; virididorsata 22.

Astigmus Gabonis 99. 99; sericeus 97. 288; ventralis 99. 99.

Astilbus opacicollis 95. 385.

Astycophilus 97. 348. Astycophobus 97. 348; cretaceus 348. Astycus chinensis 97. 348; chrysochlorus, flavovittatus 348.

Ataenia 98. 386; albopunctata 393; biplagiata 394; egregia 393; Fruhstorferi 95. 288; malabariensis 98. 395; picta 394; 4-maculata 95. 288.

Atalanta rubicunda 96. 32; ventricosa 32.

Atemeles T. 96. 253; emarginatus 94. 283; excisus 283; hirsutus 93. 102; pubicollis 94. 281, 99.

Athesapeuta affinis 98. 329; immaculata 327; scutellaris 96. 145; soror 98. 328.

Atheta allocera 93. 34; asperiventris 36; homöopyga 30; insecuta 31; obtusidens 95. 119; Sahlbergi 93.

32; turbida 33; virilis 35. Athoomorphus 98. 156; cylindricus 156.

Athous exceptus 98. 152; Henoni 97. 63; perniger 96. 35; Rosinae 99. 203.

Atmesia 98. 281.

Atomaria berolinensis 99, 413; myrmecophila 95. 310.

Atomyria 94. 102; sarafschanica 102. Atractocerus ater 95. 163; pygmaeus

Atrichelaphinis 98. 220.

Atrichia Bugnioni 97. 408.

Atropidius 95. 327; Hauseri 327. Attagenus aurantiacus 99. 274.

Auchenia thalassina 96. 296.

Aulacophora aeneipennis 95. 185; elegantula 181.

Auletobius irkutensis 93. 201; longicollis 98. 299.

Aulonoscelis 96. 173.

Axyra elongata 95. 149; perforata 149.

Balaninus fasciatus 99. 330; kolae 98. 52, lepidus 301; rubripes, simus 300.

Balanogastris 98. 52, 70; austerus 70; honestus 72; plausibilis 71. Baridius subcylindricus 98. 326.

Baris amanda 95. 248; Bohemanni 97. 189; caucasica 397; decorata 95. 247; dimidiata 224; excellens 248; Helleri 97. 95; Hochhuthi 96. 146; Korbi 99. 383; pusiola 95. 247; saeva 98. 325; serbicus 97. 189; subtilina 99. 208; Suffriani 96. 146; vicaria 146; x-album 98. 325.

Barybaena imitans 95. 172.

Barypithes liptoviensis 94. 249; montanus 97. 203.

Bathyscia Gobanzi 98. 339.

Batophila 99. 379. Beckerium 97. 164, 99. 39.

Bedelia angustata 94. 103; persica

Belonnotus 99. 187; tricarinatus 187. Belonuchus subdentatus 95. 130. Bennigsenium 97. 61; planicorne 61. Berethia 98. 313; praeambulus 313.

Bia 96. 31.

Blaps 93. 316. Bledius clavatus 93. 60; Hauseri 94. 40; littoralis 93. 59; opacicollis 59; rectangulus, rugosulus 61; sinuaticollis 99. 218.

Blosyrus ornatus 97. 338.

Bohemanius 98. 265.

Bolbocranius bicolor 98, 371.

Bolbotritus Bainesi 96. 153.

Boschalis 97. 304; podagrica 98. 121; usambarica 97. 304. Bostrychophorus 93. 330.

Bothrideres costatus 95. 161; sculpticollis 161.

Bothynoderes Ballioni 94. 62; sub-

fuscus 61. Brachiodontus 97. 187; alpinus 187; Ganglbaueri 188; Reitteri 187.

Brachygluta nodiventris 99. 274. Brachymacroma 96. 74; rufithorax 74.

Brachypeplus Deyrollei 95. 146; frater 146; Grouvellei 145, 437. Brachypterus immundus 99. 199.

Brachypteryx 99. 56; leucographus

Brachytemnus cephalotes 98. 333. Brachyxystus 97. 355; subsignatus

Bradybatus duplipilis 98. 356; nigripes 355; ornatoides 354; rufipennis 355.

Brontes africanus 95. 162, 437.

Bruchus ochraceosignatus 94. 65. Brumus frater 95. 325; suturalis, trivittatus 326.

Bryochaeta interrupta 98. 20; quadrimaculata 20; viridis 19.

Bryocharis plagiata 93. 47. Bryoporus plagiata 93. 47.

Buprestis apicipennis 98. 344.

Byrrhus ruber 97. 216.

Byrsopages ventricosus 94. 192. Bythinus Karamani 99. 273.

Caenocera Weisei 98. 271. Calaenas Escherichi 98. 351.

Calathus maritimus 97. 197; micropterus **94**. 332.

Caledomorpha 99. 39. Caledonica 99. 39.

Callispa africana 95. 190; curta 97. 116; loxia 114; quadricollis 113; scutellaris 115; semirufa 95. 189;

testacea 189. Callisthenes rugiceps 96. 332.

Callitheres Louvelii 99. 86. Calochroa Andrewesi 94. 171; Fabricii 171; flavoguttata **95.** 359; Kraatzi **94.** 172.

Calometopus Nyassae 96. 75.

Calomicrus grandis 94. 106; sericeus 105.

Calomycterus obesus 97. 382.

Calopepla Andrewesi 97. 97; nigriventris, obscura 98.

Calosoma deserticola 96. 331; Hartmanni 339; Reitteri 340.

Calydus Escherichi 98. 351.

Calyptopsis T. 96. 305; aequalis 308; capnisoides 307; laevipennis, lineimargo, nitescens 310; ovalis, pandaroides 308; Rosti, sulcimargo 306.

Camptorhamphus 98. 32 dorsalis 32. Camptorhinus antiquus 95. 242.

Campylopsephus 99. 65, T. 66; dimidiatus 67, 72; haemorrhoidalis 66, 69; impressicollis 67, 71; laticollis, modestus 66, 70; nigromarginatus 66, 68.

Campyloscelina T. 98. 77. Candézea violacea 95. 188.

Cantharis curtipennis 98. 346.

Carabus basilicus 96. 345; calosomoides 347; corpulentus 336; Creutzeri 328; Famini 345; Favieri 343; fossiger 329; Gordius 98. 360; Gotschi 96. 346; inconspicuus 346; intermedius 97. 32; Katharinae 98. 360; laevipennis 96. 345; lateralis 344; laticollis 343; lineatus 344; microderus 345; Neumayeri 97. 78; nigrinopomeranus 95. 272; omphreodes 98. 337; orientalis 97. 22, 77; ottomanus 96. 346; principalis 94. 139; pseudonothus 96. 327; reductus 345; remotus 347; rugosi-pennis 345; saphyrinus 97. 22; serbicus, serratus 78; splendens 96. 344; Stroganowi 343; tauricus 97. 79; tibialis 80; Tientei 96. 347; Troberti 344; turcicus, Victor 346; Zwickii 345.

Carcinops togoensis 95. 265.

Cardiophorus 95. 40; adjutor, agnatus 37; basalis 98. 192; cinereus 95. 37; Gabrieli 98. 335; Henoni 95. 37; incanus, Lethierryi 37; minutissimus 98. 150; musculus 95. 39; nigripes 98. 191; nubilosus 95. 37; pauper 37; Raffrayi 96. 92; rubripes 95. 37; rufiventris 98. 148; semirufus 149; Senaci 95. 37; someheticus 96. 148; trimaculatus 94. 146; versicolor 95. 37: vexillarius 37. Cardiostichus alboscutellatus 99. 89;

Mechowi, viridulus, vitticeps 89. Carolina borneensis 98. 395; malabariensis 395; picta 93.71; picturata 99. 398; puncticollis 98. 395;

Rafflesiana 395.

Carpathophilus 96. 347.

Carpophilus mutilatus, o hropterus, scutellaris 95. 147.

Cassida Andrewesi 97. 111; areata 96. 20; Belli 97. 112; clathrata 97. 105; conformis 96. 29; decolorata 19; Hauseri 94. 72; icterica 97. 111; illota 96. 17; morata, mutabilis 19; nigroguttata 20; nigromaculata 19; obovata 17; 8-guttata, opposita 23; peculiosa 95. 224; 4-guttata 96. 23; 4-plagiata 23; soror 30; spadicea 29; spissa 97. 112; subeuropaea **96.** 19; variegata 31; velaris 28.

Cassidae T. 96. 13. Cassidula Hauseri 94. 72.

Catolaena 99. 282.

Catomulus 96. 302; subaeneus 302.

Catopomorphus Foreli 95. 47. Caulosomus 98. 88; sulcicollis 89. Cechenus Boeberi 96. 341; euxinus

342; Favieri 343; Fischeri 342, 97. 23; laticollis 96. 343; Pirichodkoi 342.

Centrocorynus flavotorosus 98. 296. Centrognathus 99. 63.

Centrostethus 98. 414.

Cephaloclerus 99. 105; corynetoides, cyanescens, rufofemoratus 106. Cephalocosmus Moewisii 95. 107.

Cephennium Moreli 98. 338; simile **93**. 353.

Ceralces 95. 347, T. 348; sansibarensis 349.

Cerallus longulus 96. 38; Schilskyi 38; smaragdinus 37.

Ceratocrates Haroldi 96. 126; Hildebrandti 125.

Ceratoderus bifasciatus 95. 44. Ceratogonia Kolbei 99. 141.

Cercidocerus bipunctatus 93. 318; Chevrolati 319; erythrocerus, eximius 320; fabrilis, funebris 319; interrupta 318; lateralis 319; nervosus, nigrolateralis 318; 4-maculatus 320; Schönherri 319; securifer, sutura-alba 318; tristis 319.

Cerobates cruentatus 98. 372; hybridus 371; punctulatus 373.

Ceropria viridis 97. 160. Cetonia magnifica 98. 15; ochroplagiata 95. 283, 285; peregrina 98. 224; purpurascens 97. 405; rufocuprea 95. 112; stillata 98. 222; tristicula 409.

Cetoniden aus Madagasc. 95. 219;

Ostafrica 96. 71.

Platynaspis ferruginea 95. usambarica 97. 310, 304.

Platynoptera suturalis 98. 367. Platynoscelis Balassogloi 96. 176; blapoides 175; Haberhaueri 176; humeralis 175; pinguis, turanica

176. Platyomicus humeralis 95. 227. Platypria centetes 95.193; coronata, 10-spinosa 193.

Platyprosopus biseriatus 95. 400. Platyscelis aralensis 96. 174; Hauseri 173, 99. 205; kirghisica 96. 174; Seidlitzi 173.

Platysthetus praetermissus 93. 58. Platyxantha dimidiaticornis 95. 188; nigripes 187.

Plectes Fauconneti 99. 193; Jünthneri 193.

Pleuronota 6-maculata **94**. 141. Pleuropterus flavolineatus 99. 143. Plinthus 97. 67, T. 75; Gerli 68;

Rosti 95. 304.

Pocadius africanus 95. 152. Podagrica Menetriesi 94. 106; niger-

rima 152; robusta 106.

Podispa **97**. 143.

Poecilochroa rufipes 98 364.

Poecilophana 95. 285; ochroplagiata

Poecilophilides 98. 406.

Poëphila 95. 342; lacessita 342.

Pogoniotarsus concolor 95. 223; crucifer, humeralis, 4-maculatus 223;

setiger 94. 152.

Pogonostoma 93. 13; affine 14; chalybaeum, coeruleum, cyanescens 13; Klugi 14; Kraatzi 94. 221; ovicolle 93. 15, 94. 238; pubescens 93. 13; Schaumi 16, 94. 238; pubescens 93. 13; Schaumi 16, 94. 238; Sikorae 239; spinipenne 93. 13; Srnkae 15; viride

Pogonoxenus 99. 172; Kraatzi 173. Polyarthron aegyptiacum 93. 69; afrum 69; Bienerti 94. 66; Komarowi 65; pectinicorne 93. 70;

unipectinatum 69.

Polycleis africanus 96. 184; albicans, angusticollis, cinereus, curvispinis, difficilis, suturatus, vestitus 181.

Polydrusus T. 99. 206; marmoreus, picticornis, prasinus 207; taly-schensis, Virbius 206.

Polyphylla hirtifrons 99. 202.

Polyrhabdotus 96. 133; transversalis 134.

Polystalactica piceola 99. 365; spectabilis 366; zanzibarica 96. 80. Pomachilius Drakei 96. 101; virgu-

latus 101.

Poophagus araneipes 98. 270; Hopff-

garteni 97. 199, 98. 270.

Popillia Bennigseni 99. 211; bisignata 212; borneensis 97. 330; brunnicollis, circumducta 327; concolor 328; distigma 99. 211; flavitarsis 213; flavotaeniata 97. 333; lugubris 328; plagicollis, puncticollis 329; tristicula 99. 214.

Poria rubens 99. 271; violacea 96.

Porphyrobabta trigina 97. 413. Potosia aethiessoides 98. 343.

Prepusa 93. 330. Prepusini 99. 37, 44. Priocera similis 98. 362.

Prioptera Andrewesi 97. 99; fuscicornis 101; nigricollis 100; nigricornis, punctipennis 101.

Procephalus Chaudoiri 95. 353; Dormeri 98. 196; rugifer 95. 354.

Procerus caucasicus 97. 22; lati-collis 96. 340, 97. 22; scabrosus 96. 348; Sommeri 348.

Procrustes anatolicus 97. 22, 78; Kindermauni 96. 340.

Prometopia binotata 95. 149. Promorphocarabus simulator 96. 329.

Pronomaea africana 95. 120.

Pronyssa 93. 328. Prosodes 93. T. 261, 315; aciculata 274; alaiensis 273; Amathia 275; angulicollis 266; angustata 268; angusticollis 311; angustipleuris 292; areolata 269; asperipennis 311; Baeri 301; Ballionis 297; Banghaasi 293; blapoides 292; brevipes 269; brevipes 269; brevitarsis 299; calcarata 309; catenulata 288; composita 291; convergens 283; costifera 279, 308; costipennis 270; cribrella 280; cylindraceus 301; deplanata 271; dilaticollis 302; diloides 298; divergens 283; fallax 306; fulminans 303; gracilis 295; grandicollis 310; granulosa 270; Hauseri 300; Herbsti 301; Heydeni 289; Karelini 301; Kraatzi 309; Kreitneri 270; laevigata 308; lateralis 276; laticauda 96. 38; longicornis 93. 273, 302; lucida 297, 302; minuta 267; Motschulskyi 311; mucronata 291; nalepoides 299; nitida 267; nitidula 270; obliquesulcata 294; obtusa 304; Oschanini 275; parallelocollis 296; parum-punctata 289; phylacoides 285; pleuralis 266; praelonga 286; prosternalis 284; pruinosa 308; pubistriata 307; punctimana 284; pygmaoa 310; 4-costata 278; reflexicollis 290; Reitteri 285; rufipes 308; rugosicollis 305; rugulosa 270; Semenowi 273; similis 270; Solskyi 281; spectabilis 287; Staudingeri 301; striata 289; strigi-ventris 277, 305; sulcicauda 290; transfuga 304; transversosulcata 280; triangulipes 282; trisulcata

280; undulata 294; valida 304; vicina 280; ypsilon 296. Prosoestus furcatus 99. 332.

Prosopocoelus Möllenkampi 95. 287;

Rosenbergi 94. 162. Protaetia cupreola 99. 237; Heydeni 97. 406; mindoroensis 94. 298.

Protinus crassicornis 93. 66.

Protorina 94. 252, T. 255; retenta

Psadacoptera bipunctata 98. 92. Psalidium cribricolle 94. 190; Des-

brochersi, latifrons 189.

Psammocryptus rugiceps 96. 311. Psammodes Bennigsenii 97. 46; va-

lidus 48.

Psephus 99. 65; agriotiformis 98. 188; antennatus 99. 65; athoiformis 98. 188; circumcinetus 138; discolor 99. 79; dorsalis 80; fer-rugineus 98. 187; filicornis 136; inflatus 135; laticornis 137; Mechowi 99. 65; nigrolimbatus 98. 140; pectoralis 96. 90; rubripennis 98. 136; rufipennis 99. 80; rugulipennis 65; semiferrugineus **96**. 95. **99**. 65; semirufus 80; semirugulosus **98**. 138; serratipennis 139; sordidulus 96. 94; variabilis 90. Pseudagriotes 96. 103; Holtzi 104.

Pseudanatona 95. 112; cupripes 98. 224; peregriua 97. 403; rufocu-

prea 95. 112.

Pseudanthracophora 98. 407; striatipennis 407.

Pseudaplasta 98. 93; cinerea 93.

Pseudeuryomia 94. 297.

Pseudispella 95. 198, 97. 145; incerta 95. 199; Petitii 199; sulcicollis 198.

Pseudocastalia 96. 84; Bennigsenii, viridicyanea 86.

Pseudocechenus pseudonothus 96. 327, **97**. 26, 31, 78.

Pseudocolaspis cupreomarginatus 95. 176; parvula 177.

Pseudocrania africana 95. 352; nigricornis 345, 352. Pseudodasytes T. **94**. 233.

Pseudomela T. 95. 348; angolensis

Pseudophyllocerus atricolor 97. 64. Pseudoporus 93. 206; furcifer 206. Pseudoprotaetia pilicollis 97. 406; puncticollis 99. 108; soror 109.

Pseudopygora 97. 404.

Pseudospilophorus 99. 62. Pseudotribax 94. 32, 95.

Pseudoxychila ceratoma 93. 326.

Psiloptera guttulata 98. 199; marginata 199.

Psilothryx T. 94. 235; aeneus 230; plumbeus 95. 164; smaragdinus **94**. 230; splendidus, ultramarinum 236.

Psyllobora 99. 374; Drakei 93. 96. Psylloides Sicardi 94. 90.

Ptaesiorhina Hotoni 96. 352.

Pterocoma Chan 97. 219; subnuda 218.

Pterostichus Adelaidae 99. 196; baldensis, Palae 364.

Pterothorax 93. 68; Korbi 68.

Ptochus horridulus 97. 354; noxius, ovulum 353.

Pullus gnavus 95. 210; quisquilius **97**. 302; usambaricus 301.

Pycnocephalus 95. 160; angustus 161; validus 160

Pygora concolor 97. 403; erythroderes 403; ruficollis 403, **98**. 218. Pygoropsis albomaculata 97. 336.

Pygostenus 95. 141; Espadon 97. 278; Raffrayi 278.

Pyrrhostigmatium 99. 96; parvum, rufopiceum 97; rufum 96.

Quedius apicicornis 95. 391; atri-capillus 99. 273; bipunctatus 95. 390; flavopilus 99. 218; limbatus 93. 49; meledanus 99. 288.

Radama T. 97. 263; fimbriatus 93. 107; sulcatus 97. 262.

Radamides 97. 261; trifoveolatus 262.

Reichenbachia nodiventris 99. 274. Reitteria Escherichi 96. 238.

Reninus seminitens 93. 174.

Rhabdotis dorsolineata 97.192; interpunctata 192; pieta, sobrina 191; suturaalba 192.

Rhadinomerus cicur 98. 30; miser

Rhagium fortipes 98. 357; inquisitor 357.

Rhagonycha nigroterminata 98. 346. Rhagopteryx bilineatus 99. 55; Brahma 56.

Rhinacosmus 95. 108; zebuanus 109.

Rhinhyptia 95. 104; dorsalis 106; nigrifrons 105; ruficollis 106; suturalis 104.

Rhinoncus denticollis 98. 162; Jakovlevi 93. 205; pyrrhopus, sibiricus 205; sulcipennis 98. 233. Rhinoscapha pulicaria 99. 20.

Rhizotrogus Sieversi 96. 33.

Rhynchites canus 98. 297; ferox 298; Kawiensis 99. 23; sanguinicollis 343; Wahnesi 24.

Rhynchoclaviger 93. 111, 106. Rhynchodonia leonina 97. 279. Rhyncolus angusticollis 96. 188.

Rhytidosoma dentipes 97. 203; Ganglbaueri 188; Pici 99. 293; Reitteri 97. 187.

Rodolia insularis 95. 55; occidentalis 98. 122; rubea 95. 55.

Saprinus cribellatus 94. 42; Hauseri 42; lateralis 43; metallicus 93. 190; rugifrons 190; semiopacus **94**. 41; viridicatus 42.

Scaphidiidae aus Togo 95. 154. Scaphosoma pallipes 95. 154. Schizillus 99. 166; Rogersi 166. Sciaphilus parvulus 97. 203. Sciobius geniculatus 96. 122. Scolytoproctus 95. 250, 252, 98. 76; kamerunicus 81; Schaumi 95. 251; Goeldii 99. 411.

Scymnomorphus 97. 303; niger, parvulus, rotundatus 304.

Seymnus gnavus 95. 210; moroeus 97. 302; nigricans 98. 336; plebeius 95. 211; quisquilius 97. 302; usambaricus 301; viduus 302. Scythis humeridens **96.** 300.

Scythodonta 96 300.

Scythosoma 96. 299.

Sebaethe lateritia 95 338; obscurotestacca 338.

Semichnoodes cineta 98. 121. Semiclaviger 93. 102; Sikorae 103. Semijulistus callosus 94. 227.

Seminolus fulvo-setosus 99. 199; imstriatus 96. 172; subaeneus 172. Serica Koltzei 97. 214; ornata 94.

202; rufescens 199; rufobrunnea 203; sumatrana 200; unicolor 201. Sibinia Fausti 96. 46; lactaria, turcomanica 47.

Sicardia 96. 318; psammodiformis 318.

Silpha 6-punctata 97. 204. Silvanus filum 95. 162. Simorrhina 4-maculata 98. 200. Sindia 97. 105. Singhalenus Candezi 96. 97. Smicronyx anthracinus 98, 285; ba-

salis 97. 398; bituberculatus 98. 285.

Solanophila acuminata 99. 384; acuta 384; basalis 265; cincta 98 128; discolor 99. 263; dissepta 98. 113; divisa 99. 263; fallax 98. 110; ferruginea 113; gemina 99. 259; geometrica 264; harmala 98. 111; honesta 99. 262; humeralis 98. 128; inserta 99. 263; interrupta 98. 112; Kraatzi 110; languida
 99. 258; lepida 259; monticola
 98. 110; passiva 99. 261; propinqua 266; proteus 98. 127; pruinosa 99 258; pulchra 262; punctaria 98. 112; seria, subsignata 112; suturalis 128; turbida 110; vittigera 99. 264.

Spartiophila Mannerheimi 94. 72. Sphaeroderma lateritium 95. 338; obscurotestaceum 338; parvulum

337.

Sphaerula indicus 98. 306. Sphegestes arietoides 99. 281. Sphenaria Hauseri 94 48. Sphenocorynus Fausti 99. 32. Sphenoptera cylindracea 97. 215.

Sphyrorrhina 96. 67.

Spilophorus 99. 63; bangalorensis, lugubris, plagosus 63. Stalagmoptera ruginota 96. 39.

Stalagmosoma baliola 95. 380; luctuosa 99. 110; megastalactica 110. Staphylinidae, dorylophile 99. 175. Stasiastes 95. 253, 98 76; glabratus

**95**. 252.

Stasiodis parvulus 97. 203. Stelisea tuberculata 94. 210. Stenocarus lividus 97. 306; Reitteri

307; Schüppeli 95. 430.

Stenocephalus 98. 281.

Stenolanguria 95. 206; caudata 206; concolor, tricolor 207.

Stenolomaptera 98. 95; aurora 95. Stenolophus Klettei 99. 217; morio 94. 35; nigripes, proximus 35.

Stenosis dentipennis 99.168; Wroughtoni 169.

Stenovalgus 95. 63; bifasciatus 97.

247; convexicollis 95. 64; gracilis

63; 5-dentatus 97. 247.

Hôtel Roessiger.

### Auszug aus den Statuten.

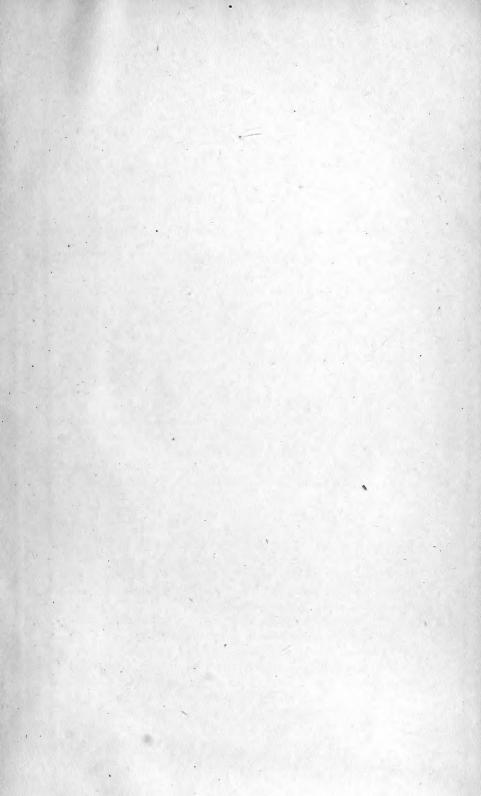

Der Zweck unserer Deutschen Entomologischen Gesellschaft ist: durch die Herausgabe einer Zeitschrift die wissenschaftliche Kenntnis der Entomologie zu fördern und durch wöchentliche Zusammenkünfte der Berliner Mitglieder einen regen Verkehr zwischen denselben zu erhalten. — Die Anlegung einer Vereinssammlung von Insecten findet nicht statt.

Mitglied der Gesellschaft kann ein jeder werden, welcher sich für die Förderung der Entomologie interessirt.

Die Aufnahme in die Gesellschaft erfolgt, sobald der Aufzunehmende dem Vorstand oder einem der Berliner Mitgl. von seiner Geneigtheit zum Beitritt und zum Halten der Vereinsschrift Mittheilung gemacht und zum Mitgliede vorgeschlagen ist, ohne begründeten Einspruch gegen seine Aufnahme.

Für die Ausfertigung des Diploms sind 1,50 Mark zu entrichten. Der franco pränumerando einzusendende Jahresbeitrag beträgt 10 Mark, wofür die Zeitschrift franco zugesendet wird.

Der Preis der beiden ersten Berliner Hefte jeden Jahrgangs der Deutschen Entom. Zeitschrift beträgt im Buchhandel meist 20 Mark; frühere Jahrgänge der Deutschen Entomologischen Zeitschrift werden an Mitglieder für 7—10 Mark abgegeben.
